

Parking options for the 2024 season

It is free to park in all these locations.

Parking available every day

- **Lido car park (168 spaces)** - always available on a first-come-first-served basis for visitors to Aldershot Pools and Lido.
- **Aldershot Park car park (130 spaces)** - always available on a first-come-first-served basis. Also used by visitors to the park and playground, and busier if cricket, rugby or football matches are being held in the park.
- **On-street parking** - there are a number of streets adjacent to the lido on which visitors can park. On busy days, a significant number of vehicles visit the area, and inconsiderate parking can be an issue. **Please park responsibly.** On-street parking is now managed by Hampshire County Council with Enforcement Officers employed by their contractors, NSL. Residents should direct on-street parking issues to parking.services@hants.gov.uk

Overflow parking only opened on busy days

- **Lido car park overflow (110 spaces)** - located at the rear of the lido grounds, and accessible from the gate at the far left of the lido car park. This overflow option was created in 2023 and originally provided around 80 spaces. For this season, the fencing has been moved slightly further inside the grounds to increase the capacity by 30 spaces. This will be the first overflow option opened on busy days, with the Aldershot Park or Crematorium overflows (below) only opened if this area is full.
- **Aldershot Park overflow (60-100 spaces)** - first introduced in 2021, when a gate to the park was installed to allow vehicle access to the grounds, this additional overflow option can generally be used for around 60 cars. However, if the ground is dry and no cricket is being played, capacity can be increased to 100 on certain days.
- **Aldershot Crematorium overflow (50 spaces)** - The crematorium is now closed until Spring 2025 for major refurbishment works. A total of 50 spaces of the 80-space car park fall outside the construction site and can be made available to lido customers if required. This facility will only be opened as a last resort on very hot/busy days.
